

Configuration Standardization Report - Day 4

Summary

Configuration standardization completed across all environments with consistent structure and naming conventions.

Standardized Components

ansible.cfg

- **Sections:** 13 configuration sections
- **Status:** Duplicate sections resolved (Day 1)
- **Security:** Enhanced SSH configuration applied
- **Performance:** Optimized for production use

Environment Structure

- **dev:** 1 configuration file
- **test:** 1 configuration file
- **prod:** 2 configuration files (includes AI/ML config)
- **Consistency:** Standardized variable naming across environments

Quality Assurance Results

-  **YAML syntax validation:** All files pass
-  **Script permissions:** All executable scripts properly configured
-  **Directory structure:** All required directories present
-  **Configuration consistency:** Standardized across environments

Validation Status

- **QA Suite:** PASSED on dev/test environments
- **Blue-Green Framework:** Structure validated
- **Configuration Merge:** Ready for production deployment

Next Steps

- Documentation consolidation (Day 5)
- Final validation and cleanup (Day 6-7)
